(3) For the purposes of Paras (1) and (2), investment management companies (SAIs) shall take the following actions for each UCITS they manage:

Where appropriate, investment management companies (SAIs) shall conduct stress tests which enable assessment of the liquidity risk of the UCITS under exceptional circumstances.

(5) Investment management companies (SAIs) shall ensure that for each UCITS they manage the liquidity profile of the investments of the UCITS is appropriate to the redemption policy laid down in the fund rules or the constitutive acts of the investment company or the prospectus.

Art. 47

(1) Investment management companies (SAIs) shall calculate the global exposure of a managed UCITS as referred to in Art. 84 Para (6), as either of the following:

a) the incremental exposure and leverage, defined according to NSC regulations issued for the purposes hereof, generated by the managed UCITS through the use of financial derivative instruments including transferable securities or money market instruments embedding derivatives pursuant to Art. 84 Para (10), which may not exceed the total of the UCITS net asset value;

b) the market risk of the UCITS portfolio.

(2) Investment management companies (SAIs) shall calculate the UCITS global exposure on at least a daily basis.

(3) Investment management companies (SAIs) may calculate global exposure by using the commitment approach, the value at risk approach or other advanced risk measurement methodologies as may be appropriate. used, and the proportion of the UCITS portfolio which comprises financial derivative instruments.

(5) Where a UCITS, in accordance with Art. 84 Para (4), employs techniques and instruments, including repurchase agreements or securities lending transactions in order to generate additional leverage or exposure to market risk, investment management companies (SAIs) shall take these transactions into consideration when calculating global exposure.

Art. 48

(1) Where the commitment approach is used for the calculation of global exposure, investment management companies (SAIs) shall apply this approach to all financial derivative instrument positions including security or money-market instrument positions embedding derivatives as referred to in Art. 84 Para (10), whether used as part of the UCITS general investment policy, for purposes of risk reduction or for the purposes of efficient portfolio management.

(2) Where the commitment approach is used for the calculation of global exposure, investment management companies (SAIs) shall convert each financial derivative instrument position into the market value of an equivalent position in the underlying asset of that derivative.

(3) Investment management companies (SAIs) may take account of netting and hedging arrangements when calculating global exposure, where these arrangements do not disregard obvious and material risks and result in a clear reduction in risk exposure.

(4) Where the use of financial derivative instruments does not generate incremental exposure for the UCITS, the underlying exposure need not be included in the commitment calculation.

(5) Where the commitment approach is used, temporary borrowing arrangements entered into on behalf of the UCITS in accordance with Art. 103 need not be included in the global exposure calculation.

Art. 49

(1) Investment management companies (SAIs) shall ensure that counterparty risk arising from an over-the-counter (OTC) financial derivative instrument is subject to the limits set out in Art. 85.

(2) When calculating the UCITS exposure to a counterparty in accordance with the limits as referred to in Art. 85 Para (2), investment management companies (SAIs) shall use the positive mark-to-market value of the OTC derivative contract with that counterparty.

Netting shall only be permissible with respect to OTC derivative instruments with the same counterparty and not in relation to any other exposures the UCITS may have with that same counterparty.
Investment management companies (SAIs) may reduce the UCITS exposure to a counterparty of an OTC derivative transaction through the receipt of collateral. Collateral received shall be sufficiently liquid so that it can be sold quickly at a price that is close to its pre-sale valuation.

Investment management companies (SAIs) shall take collateral into account in calculating exposure to counterparty risk as referred to in Art. 85 Para (2) when the investment management company (SAI) passes collateral to OTC counterparty on behalf of the UCITS. Collateral passed may be taken into account on a net basis only if the investment management company (SAI) is able to legally enforce netting arrangements with this counterparty on behalf of the UCITS.

Investment management companies (SAIs) shall calculate issuer concentration limits as referred to in Art. 85 on the basis of the underlying exposure created through the use of financial derivative instruments pursuant to the commitment approach.

With respect to the exposure arising from OTC derivatives transactions as referred to in Art. 85 Paras (3) and (4), investment management companies (SAIs) shall include in the calculation any exposure to OTC derivative counterparty risk.

**SUBSECTION 3**
Procedures for the Valuation of the OTC Derivatives

Art. 50

Investment management companies (SAIs) shall verify that UCITS exposures to OTC derivatives are assigned fair values that do not rely only on market quotations by the counterparties of the OTC transactions and which fulfil the criteria set out in NSC regulations transposing the provisions of Article 8 paragraph (4) of Commission Directive 2007/16/EC of 19 March 2007 implementing Council Directive 85/611/EEC on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (UCITS) as regards the clarification of certain definitions.

The valuation arrangements and procedures shall be adequate and proportionate to the nature and complexity of the OTC derivatives concerned.

Investment management companies (SAIs) shall comply with the requirements set out in Art. 17 Para (2) and Art. 37 Para (4) when arrangements and procedures concerning the valuation of OTC derivatives involve the delegation of certain activities to third parties.

a) monitor and quantify, at any time, the risk associated with their position and influence on the general risk profile of the portfolio;

b) ensure a correct and independent evaluation of the value of the over-the-counter derivative financial instruments.

(2) Investment management companies (SAI) and self-managed investment companies shall communicate to NSC, on a regular basis, the types of derivative financial instruments, the risk of underlying shares, the quantitative limits and the methods chosen to estimate the risk associated to derivative financial instruments transactions for each managed UCITS.

(4) NSC may authorize UCITS to employ techniques and instruments relating to transferable securities and money market instruments, under the conditions and within the limits established by this government emergency ordinance, provided that such techniques and instruments are used for the purpose of efficient and prudential portfolio management. When these operations require the use of derivative financial instruments, the conditions and the limits shall be compliant with the provisions of this emergency ordinance.

(5) Under no circumstance shall the operations provided under Para (4) cause a UCITS to diverge from its investment objectives as laid down in the UCITS fund rules, deed of constitution of the investment company or prospectus.

(6) A UCITS shall ensure that its global exposure relating to derivative instruments does not exceed the total net value of its portfolio.
(7) The exposure is calculated taking into account the current value of the underlying assets, the counterparty risk, future market movements and the time available to liquidate the positions.

(8) A UCITS may invest, as a part of its investment policy and within the limit provided under Art. 85 Paras (9) to (12), in financial derivative instruments provided that the exposure to risk of the underlying assets does not exceed in aggregate the investment limits laid down in Art. 85.

(9) When a UCITS invests in index-based financial derivative instruments, NSC may allow that these investments do not have to be combined to the limits laid down in Art. 85.

(10) When a transferable security or money market instrument embeds a derivative, the latter must be taken into account when complying with the requirements of this article.

Art. 85

(1) A UCITS may invest no more than 5% of its assets in transferable securities or money market instruments issued by the same body. A UCITS may not invest more than 20% of its assets in deposits made with the same body.

a) 10% of its assets when the counterpart is a credit institution referred to in Art. 82 Letter e); or

b) 5% of its assets, in other cases.

(3) The 5% limit provided in Para (1) may be raised to maximum 10% provided that the total value of the transferable securities and the money market instruments held by the UCITS in the issuing bodies in each of which it invests more than 5% of its assets must not then exceed 40% of the value of its assets.

This limitation does not apply to deposits and over-the-counter derivative transactions made with financial institutions subject to prudential supervision.

(4) Notwithstanding the individual limits laid down in Paras (1) and (2), a UCITS may not combine, in a proportion exceeding 20% of its assets:

a) investments in transferable securities or money market instruments issued by the same body;

b) deposits made with the same body; or

c) exposures arising from over-the-counter derivative transactions undertaken with the same body.
The 5% limit provided in Para (1) may be raised to maximum 35%, if the transferable securities or money market instruments are issued or guaranteed by a Member State, by its local authorities, by a non-member State or by public international bodies to which one or more Member States belong.

The 5% limit provided in Para (1) may be raised to maximum 25% in the case of certain bonds when these are issued by a credit institution which has its registered office in a Member State and is subject by law to special public supervision designed to protect bondholders. In particular, sums deriving from the issue of these bonds must be invested in conformity with the law in assets which, during the whole period of validity of the bonds, are capable of covering claims attaching to the bonds and which, in the event of failure of the issuer, would be used on a priority basis for the reimbursement of the principal and payment of the accrued interest.

When a UCITS invests more than 5% of its assets in the bonds referred to in Para (6) and issued by one issuer, the total value of these investments may not exceed 80% of the value of the assets of the UCITS.

NSC shall send to ESMA and the Commission a list of the categories of bonds provided under Para (6) together with the categories of issuers authorised, in accordance with the laws and supervisory arrangements mentioned in Para (6), to issue bonds complying with the criteria set out above. A notice specifying the status of the guarantees offered shall be attached to these lists.

The transferable securities and money market instruments referred to in Paras (5) and (6) shall not be taken into account for the purpose of applying the limit of 40% referred to in Para (3).

The limits provided for in Paras (1) to (7) may not be combined, and thus investments in transferable securities or money market instruments issued by the same body or in deposits or derivative instruments made with this body carried out in accordance with Paras (1) to (7) shall under no circumstances exceed in total 35% of the assets of the UCITS.

Companies which are included in the same group for the purposes of consolidated accounts, in accordance with European laws or in accordance with recognised international accounting rules, are regarded as a single body for the purpose of calculating the limits contained in this article.

Cumulative investment in transferable securities and money market instruments within the same group are allowed up to a limit of 20%.

Art. 86

Without prejudice to the limits laid down in Art. 90, the limits provided in Art. 85 may be raised to maximum 20% for investment in shares and/or debt securities issued by the same body when, according to the fund rules or deed of constitution of the investment company,
the aim of the UCITS investment policy is to replicate the composition of a certain stock or debt securities index which is recognised by the competent authorities, on the following basis:

b) the index represents an adequate benchmark for the market to which it refers;

The investment up to this limit is only permitted for a single issuer.

Art. 87

(1) By way of derogation from Art. 85, NSC may authorize UCITS to invest in accordance with the principle of risk-spreading up to 100% of their assets in different transferable securities and money market instruments issued or guaranteed by any Member State, its local authorities, a non-member State or public international bodies of which one or more Member States are members.

(2) NSC may grant such a derogation only if it considers that unit-holders in the UCITS have protection equivalent to that of unit-holders in UCITS complying with the limits laid down in Art. 85.

(3) The UCITS referred to in Para (1) must hold securities and money market instruments from at least six different issues, but securities and money market instruments from any one issue may not account for more than 30% of its total assets.

(5) Each such UCITS referred to in Para (1) must include a prominent statement in its prospectus and any promotional literature drawing attention to the authorisation provided in Para (4) and indicating the States, local authorities and/or public international bodies in the securities and money market instruments of which it intends to invest or has invested more than 35% of its assets.

Art. 88
(1) A UCITS may acquire the units of UCITS and/or other collective investment undertakings referred to in Art. 82 Letter d), provided that no more than 20% of its assets are invested in units of a single UCITS, or 10% in units of other collective investment undertaking.

(2) A UCITS that invests a substantial proportion of its assets in other UCITS and/or collective investment undertakings shall disclose in its prospectus the maximum level of the management fees that may be charged both to the UCITS itself and to the other UCITS and/or collective investment undertakings in which it intends to invest. In its annual report it shall indicate the maximum proportion of management fees charged both to the UCITS itself and to the UCITS and/or other collective investment undertaking in which it invests.

(2) NSC may allow a UCITS to derogate from the provisions of Art. 85-88 for six (6) months from its authorisation, while supervising the observance of the principle of risk-spreading.

(3) If the acquisition limits are exceeded or reasons beyond the control of a UCITS or as a result of the exercise of subscription rights, that UCITS must adopt as a priority objective for its sales transactions the remedying of that situation as soon as possible, taking due account of the interests of its unit-holders.
